

What makes a Q-LINN different from every other sports bra?

*The Amsterdam bra on the right has a slightly wider cup and wire compared to the Athens model on the left which guarantees optimal fitting for everybody. The Barcelona model (below) has a more closed and supportive cup

* Breathable pre shaped cup padding

* Breathable "Power Mesh" in between the cups

* Extra wide elastic band for both support and comfort

* Extra wide and padded shoulder straps

* With hook and eye system to turn the sportsbra in one twist to normal straight shoulder straps (as on the right)

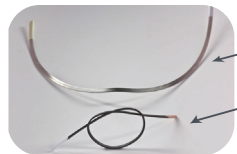

* Strong elastic adjustable shoulder straps

* Extra strong and breathable "power mesh" wings

* All three models have the 3X3 closing for optimal comfort and pressure spreading

* Barcelona Model, up to cup I, high supportive bra with flexible wire, pre shaped cups, wide underband and racerback closure.

* Normal (sports) bra wire

* Patented shape recovery wire, specially used by Q-LINN, comfortable and ideal for sporting! flexible, ideal for sporting!

Fitting

When the fitting is right, the centre front part of the bra (between the breast) will sit flat against your body without a gap, the wire will sit comfortably against your ribcage and the breast will fill up the cup completely, without leaving open spaces, or bulging at the top. The elastic band under the breast will feel strong and the shoulder straps should fit in straight as a racer back closing.
